

We have had a query regarding the tender and in fairness to all possible tenderers are clarifying the following:

- The budget for the tender is £25k excluding VAT
- Page 2 point E – this is also intended to cover annual anchor bolt testing where appropriate.
- Page 2 point G – “Installation and maintenance of electrical infrastructure (where appropriate) to serve the lighting scheme, including timers and all should be certified as safe” is intended to refer for example to the timers and control gear pertaining to the lighting scheme and not the lamppost column themselves. The columns are owned by the County Council not the Town Council.
- Photo one of the existing lighting motifs attached to one of the lamp columns in daylight are shown for reference.
